

## **System Requirements for TaxWare**

Valid from Release 2.22, november 2019

## Technical Requirements for TaxWare

### Operating system

To use TaxWare and TaxAnalyzer the following minimum requirements apply:

- Microsoft Windows 7 or more recent (32/64 bit)
- Microsoft Windows Server 2008 or more recent
- Microsoft .NET Framework 4.7.2 or more recent
- Installations under Terminal Services (incl. Citrix) are supported
- For installations and updates administrator rights are required

### Office

For the integration of Excel with TaxAnalyzer the following Office versions are supported:

- Microsoft Office 2010 or more recent (32/64 bit)
  - The safety setting must allow the execution of macros
- Online version of Microsoft Office 365 is not supported

### Network connections

For licensing, updates and error feedback, the following ports must be open to the outside:

- [taxservices.fiveinfo.ch](https://taxservices.fiveinfo.ch), ports 80 and 443
- <https://update.taxware.ch>, port 443
- <https://taxknowledge.fiveservices.ch>, Port 443

### Hardware

To operate TaxWare efficiently, the following hardware capacity should be available:

- 500 MByte free working memory
- 1 GByte free hard drive space

## TaxWare System Setup
